

3 Point Deadlock with Security Lock Release – UM2010

Details

Dual locking mechanism. The deadlock cannot be activated until the housed security lock is released. All Stainless steel with adjustable roller cam.

Swinglock latch, environmentally sealed and vandal resistant, high security compression latch. The sealed unit shell of the Swing Lock provides the environmental protection and vandal resistance of chamfered stainless steel. The high security key lock inside prevents unauthorised access and works as a high torque low turn compression latch.

- Environmentally Sealed
- Vandal Resistant
- High Security
- Compression Latch
